ITEC 860.01 Distance Education (3 units)

Fall 2005

Monday – 4:10-6:55 PM, Burk Hall 170

Instructor: Dr. Brian Beatty
Office: BH 163C (inside the ITEC department office)
Office Hours: Monday 1-4 PM
Phone: 338-6833 (alternate – 338-1509)
E-mail: bjbeatty@sfsu.edu
Course URL: http://ilearn.sfsu.edu

I. Course Description

From the course catalog:
“Understanding of distance education development and delivery. Exploration of the field through demonstrations of telecommunications facilities, meetings of professional organizations, internet capabilities, and teleconferencing classrooms. Development of an instructional unit delivered via distance education.”

Prerequisite:
ITEC 800 and 801 should be completed before enrolling in ITEC 860. Permission to enroll in this course may be requested from the instructor if a student is able to demonstrate knowledge of ITEC 800 and 801 content through parallel coursework or life experience.

Introduction to Distance Education:
This course introduces the learner to the principles learning at a distance, commonly called distance education, distance learning, distributed learning, e-learning, online learning, etc. In this seminar, we will explore the complexities of designing instruction in various distance contexts (such as, corporate training, education, etc.). We will learn the fundamental instructional concepts supporting various distance learning strategies, tactics, and media, and apply these concepts in a real context through frequent online discussions and a major design project.

There are two major elements in this seminar:
1. An introduction to various distance teaching and learning methods, such as video telecommunication, print and satellite TV delivery systems, classic correspondence models, online education, and independent e-learning modules. We will explore the instructional design considerations, technical implementation requirements, and implications for learning (and teaching) with each of these methods. Your learning of this content will be assessed primarily through a short papers and hands-on activities assigned throughout the semester.
2. Practice applying instructional design skills for distance learning by planning and moderating a topical online discussion and completing a comprehensive distance learning
instructional unit design project. This project will be selected by you – working in conjunction with a small group of your peers. Your small group will choose a distance education topic and develop online activities and discussion for one week of the seminar. Additionally, your team (this may be a different team) will complete a formal design plan and produce a limited (short, but complete) instructional unit as the major assignment for the second half of the course. (Specific assignments detailed below.)

Readings assigned for each week will provide the foundation for our discussion and class activities. Readings from the text(s) encompass the majority of these assignments. Supplemental readings will provide alternative and complimentary views on distance learning (and there are many!). Finally, there will be several discussion topics that we will choose and develop together as a class, based largely on your (collective) interests.

II. Accommodation Statement

If you are a student with a disability requiring special accommodation in this course, you must be registered with the Office of Disabled Student Services (DSS). Your counselor will give you a letter that you must deliver to the instructor in person, at which time an appointment will be arranged to discuss appropriate accommodation. This must be accomplished during the first three weeks of class.

III. Learning Goals

1. Demonstrate a sound understanding of distance learning theory and practice by critiquing instructional units (commercial/educational and peer work).
2. Analyze an instructional context and determine an effective mix of distance learning strategies and tactics.
3. Create a plan for implementing a distance learning instructional unit in a specific setting.
4. Create an instructional unit (short – about fifteen minutes) and conduct a basic formative evaluation.

IV. Readings

*Required Texts:*

**Distance Education: A Systems View** (2nd Ed, 2005) by Michael G. Moore and Greg Kearsley; published by Thomson Learning/Wadsworth. ISBN/ISSN: 0-534-50688-7

These texts will be used as the primary print resources for our learning about distance education. We will read most of the material in the texts during the first two-thirds of the course. During your project work (primarily during the second half of the course), you will refer back to the texts for reference and further learning support.
Additional Readings:
Each week I will provide access to other important readings. Hopefully, these will all be available electronically so you may print your own copy, if you wish. Readings for each week will be announced during the previous week’s class and/or online at the course website (http://sfsu.blackboard.com).

If you find interesting, relevant readings on your own in trade journals, magazines, newsletters, etc., please bring them to class to share or post them to the course website.

V. Course Requirements and Grading

Basic Course Requirements:

Class Participation (10%)
This is a seminar course, implying active engagement in discussions and other class activities. Participation includes completing pre-class readings, online exercises, and joining in class discussions – both in class and online.

Reflection Posts (10%)
Weekly you will post your thoughts about the class and the distance education field in an ongoing discussion thread – similar to a “blog”. These posts are intended to help you consider questions important to you, and capture your thoughts at selected instances in time. Posts will be viewable by others, though there is no requirement for others to read your posts or vice versa. You will receive full credit for this assignment if you contribute a meaningful post once a week for 14 weeks of the semester. Specific instructions available in class the first week.

Written Assignments (40%)
Approximately four short writing assignments are due during the course of the semester. We will utilize the course website to post, update, and comment upon these short papers.

Paper 1. Front-end Analysis for DE – This 3-5 page paper will describe the front-end instructional design analysis that would be effective for a specific DE learning situation (you will choose). You will include information about and/or results from a Needs/Learner/Context/Task Analysis. Hopefully, this paper will help you start thinking about a context for your design project. As such, you should consider this paper as a tool to get you moving on your major work of the semester. More details will be provided in class at the appropriate time.

Paper 2. Distance Learning Review/Critique - This 2 page paper will be assigned and completed during the second quarter of the course. You will find, attend, and evaluate a distance learning event (seminar, course, module, etc.) and prepare a short written evaluation to turn in. You will also present a brief (5-10 minute) summary of your experience to the class. More details will be provided in class at the appropriate time.

Paper 3. White paper on a current DE topic – This paper is a 3-5 page report on any current, relevant topic in the field of distance education. You should choose and research a unique topic of your choice and prepare a summary/position paper describing the topic and its importance and/or relevance to you and the field of distance education. You may choose a topic related to
your online discussion moderation assignment (see below), but you may not choose the exact same topic as any other student. More details will be provided in class at the appropriate time.

Paper 4. Annotated Glossary/Bibliography – This paper has two major components: a five term glossary and a 10 item bibliography. For the glossary component: Choose any five terms used in the DE field, and create a short glossary entry for each. The entry should include the term, a definition (and description) of how it is used in our field, and a link to a web-based or print resource that either describes this in more detail or provides an example of the term in practice. For the bibliography component: List any 10 resources you have found to support your learning about distance education. In your list, include a short description of the resource (what is it, what is it for) and your evaluation of its usefulness. Why was it valuable to you? For each resource, give its full reference so that someone else can find it if they want to. This assignment will also contribute to a perpetual resource we are creating for the ITEC community at large. More details will be provided in class at the appropriate time.

Online Discussion Moderation (20%)
During one week of the semester, you will work with 1-2 peers to prepare and moderate instructional activities and an online discussion focused on a distance education topic of your choosing. During the first two weeks of class we will develop a list of topics and assign specific weeks to pairs of students. During your week you will be required to present a brief introduction to the topic, provide resources for students to explore on their own, and then create a threaded online discussion (or possibly schedule a synchronous chat(s) session) to coordinate student interaction on this topic. The following week, your group will present a short debrief to the class focused on the “highs and lows” of your experience. (What went well, what did not work, what would you change the next time, etc.) Finally, you will turn in a 1-2 page summary to the instructor.

Possible topics:
- Copyright
- Plagiarism
- Technology challenges – Bandwidth, etc.
- Mixing online and face-to-face methods (blended or hybrid)
- Professional organizations and conferences
- Specific uses in XXX industry/company/etc.
- Certification
- Quality Control
- others

Distance Learning Design Project (20%)
A short but comprehensive distance learning design project will be completed during the second half of the course. This project will be completed in teams of 3-4 and will require you to apply the principles of effective instructional design to create the design plan and part of the instructional content for an original unit delivered by distance learning technologies. At the final class meeting, your team will present your instructional unit during a 20 minute presentation to your peers. More details will be provided in class at the appropriate time.
Late Assignments
In order to receive full credit for an assignment, it must be turned in at the requested time. Partial credit for late assignments may be given, at the discretion of the instructor. Late assignments will receive a minimum 10% grade reduction, and will not be accepted after one week has passed since the original due date.

Grading:
A- to A  90-100 %
B- to B+  80-89 %
C to C+  75-79 %
No Credit below 75%

Incomplete:
If you do not complete the course requirements by the end of the semester, you may receive a grade of “I” (Incomplete) with prior arrangement with the instructor. 75% of all course assignments must be successfully completed prior to the end of the semester in order to qualify for consideration of an Incomplete. All Incomplete grades will have a pre-arranged deadline for completion, usually no longer than the end of the following university term (spring, summer or fall).

Changes to the Syllabus:
This syllabus is subject to change throughout the semester due to emergent student needs, important new learning opportunities, or other unforeseen situations. In the event a change must be made, the instructor will notify the students as soon as practically possible, and provide an updated syllabus on the course website.
