Many Eyes

Social Data Visualization Software

Many Eyes is an experimental web site that enables visual analysis of large data sets. It features a web-based social data visualization system called Many Eyes, which uses a simple, visual interface to analyze large data sets from many sources. Many Eyes is designed to be easy to use and can be accessed from any computer with an Internet connection.

About Many Eyes

Many Eyes was developed by the MIT Media Laboratory, which is part of the Massachusetts Institute of Technology. The site was launched in 2006 and has become a popular tool for exploring data sets of all kinds. Many Eyes is a web-based data visualization tool that uses a simple, visual interface to analyze large data sets from many sources. The site is designed to be easy to use and can be accessed from any computer with an Internet connection.
