Subject: 12th World Congress on ITS: Attend By Volunteering

Hello!

We are looking for volunteers who have an interest in attending the most comprehensive conference on intelligent transportation systems in the world next month in San Francisco. As leaders of the SAE Northern California section, the organizing committee asks for your help in getting the attached information to potential volunteers.

Please distribute and post the attached flyer to help locate volunteers for the Innovative Mobility Showcase. For more information, please go to www.itsworldcongress.org

Volunteering is a great way to experience the World Congress. It's also a great way to explore the transportation and traffic industries as a career, to make research contacts, to network with corporations, and to perform an important professional community service.

We need 70 volunteers for each day of the IMS—beginning November 6, that's 280 people over the 4 day event! With 184 guests each hour at the IMS, we need volunteers to ensure safe and smooth operations.

In appreciation, we offer a variety of thank you gifts to each volunteer including the tail gate party and official ball cap. Best of all, the organizers are extending a special day pass to attend Congress activities at Moscone Convention Center on Thursday, November 10, 2005. This includes the Executive, Technical and Special Sessions; a grand-scale exhibit hall hosting over 150 companies from around the globe; and the Closing Plenary session featuring worldwide leaders of the ITS industry.

Thank you very much for your help in promoting this effort to attract volunteers.
